

Don't Pay Extra for the "Raised without Hormones" Turkey!

If you are trying to decide what turkey to buy this year, here is my tip. Don't pay extra for a turkey that has the label, "raised without hormones." Why do I say that? Because ALL turkeys are raised without added hormones. Butterball has succumbed to the latest marketing campaign that has created food fear in consumers. Don't worry, there are absolutely NO ADDED HORMONES in turkeys or chicken or pork!
