[KitchenAid Food Strainer Grinder](#)

I bought this a few months ago. I needed to make a large amount of applesauce and wanted to find a faster way to make large batches. This was the bomb. Literally I cooked up apples (no peeling) until they were soft. I then put the apples in this strainer and it worked perfectly. Stems, cores and all. I highly recommend this if you make applesauce or any other foods that need to be strained or ground.
